

## 2024 Infection Control Clinical Test

1. The rationale for The Joint Commission's National Patient Safety Goals is to enhance patient safety.

T or F

2. One of the most important factors in preventing the spread of disease is handwashing.

T or F

3. The spread of MDRO's is controlled by all the following measures except:

- A. Contact and Standard precautions
- B. Appropriate hand hygiene
- C. Disinfection of equipment
- D. Never removing gloves while in an isolation room

4. How should you determine the wet time for a multi-purpose disinfectant wipe?

- A. Follow the label instructions provided by the manufacturer
- B. Google
- C. Estimate the time
- D. None of the above

5. If gloves are worn, handwashing is not necessary.

T or F

6. PPE is designed to protect the wearer's skin, eyes, mucous membranes, airways, and clothing from coming into contact with infectious agents.

T or F

7. Choose all that apply. Example of bloodborne pathogens include the following:

- Hep B
- Hep C
- HIV/AIDS

8. Choose all that apply. The objective of Bloodborne Pathogen program is

- Protect employees from health hazards associated with bloodborne pathogens.
- Provide appropriate treatment and counseling for exposures.

9. If exposed to blood or other infectious material, immediately wash with soap and water, flush

**eyes with water or saline solution as appropriate, and report to Employee Health.**

**T or F**

**10. What is the best way to prevent a CAUTI?**

- A. Prevent inappropriate use of foleys**
- B. Remove a foley when it is no longer necessary**
- C. Perform peri care daily and prn**
- D. All of the above**

**11. How is TB potentially spread?**

- A. Through the air via coughing, singing, sneezing, or talking**
- B. Through non-healing draining wounds**
- C. Touching contaminated surfaces in the patient's room**
- D. Eating undercooked or ill prepared foods**

**12. The nurse ordering protocol for Cdiff is only active during the first two days of a patient's admission.**

**T or F**

**13. The biohazard symbol is a universal symbol placed on any container that may contain infectious material.**

**T or F**

**14. For symptomatic COVID testing, which isolation should you order?**

- A. Standard Precautions**
- B. Airborne Isolation**
- C. Droplet Isolation**
- D. Airborne and Contact Isolation**

**15. When a central line is inserted, which order set should be placed into EPIC?**

- A. VAP Bundle**

**B. CLABSI Bundle**

**C. CAUTI Bundle**

**D. No additional ordering is necessary**

**16. Performing hand hygiene after coming into contact with body fluids is an example of gel in/gel out.**

**T or F**
