Retirement Report	8
Appendix Vacancy Charts	10
Job Titles and Descriptions	35

Participating Hospitals/Systems

The Christ Hospital Health Network

Cincinnati Children's Hospital Medical Center

Margaret Mary Health

St. Elizabeth Healthcare

TriHealth

UC Health

Note: Job titles labeled with (PP) are jobs primarily focused within physician practice settings at our participating health systems. Jobs without a (PP) designation are jobs primarily focused within hospital settings.

Executive Summary

Each year, the Health Collaborative publishes an annual and semi-annual survey to measure key workforce metrics pertinent to the Greater Cincinnati area's healthcare workforce. This report helps hospitals, physician practices, health care leaders, recruiters, schools and prospective health care students assess job openings and needs in Cincinnati area hospitals.

In this year's semi-annual survey vacancy data is effective as of June 30, 2023. Retirement data is effective for the full time period from January 1, 2023 through June 30, 2023.

Among some of the study's highlights:

Overall vacancy rates remain at very high levels in 2023. Survey results show a vacancy rate of 10 percent for total health care organization positions, which is down slightly from the 10.4 percent vacancy rate in 2022. Among hospital positions, 21 different job titles posted vacancy rates exceeding 10 percent. Additionally, eight other job titles have vacancy rates in the 7 to 10 percent range. Registered Nurses at hospitals saw a slight decrease in FTE vacancy rate at 12.1 percent, which is down from the 2022 vacancy rate of 14.4 percent.

Retirements decreased in 2023 as the overall organizational retirement rate decreased to 0.9 percent in 2023, down from 1.4 percent in 2022.

Finally, the chart on page 5 below identifies the 29 job titles with the highest vacancy rates in our region – with each job title having a greater than 7 percent vacancy rate. In more than 15 years of conducting this survey, our region has never experienced such a wide range of job shortages across all healthcare job categories as we have seen since the beginning of 2021. For comparison purposes, in a typical year with a healthy labor environment in healthcare, most job titles would have vacancy rates of approximately 5 percent.
