Nurse Preceptor Academy

Dedicated and competent preceptors are vital to the success of health care organizations and to the retention of health care professionals. The Nurse Preceptor Academy is designed to equip current and aspiring preceptors with essential education, tools and strategies to build strong preceptor-preceptee relationships.

What Will I Gain?

Preceptors play a vital role in educating nursing students, orienting new staff to their roles, and integrating them into the organizational culture. During this half-day interactive session, you will:

- Explore real-world scenarios to examine adult learning principles, analyze various learning methodologies, and apply strategies for giving and receiving feedback
- Define emotional intelligence and identify ways to use it for conflict management, coaching and professional development
- Expand your professional peer network as a new and/or existing preceptors

Commitment

The Health Collaborative is dedicated to delivering exceptional professional development opportunities for healthcare employees that empower them through meaningful and impactful content and practice.
